

SNAP-ON®

TIRE PRESSURE MONITORING SYSTEMS CERTIFICATION

The **Snap-on Tire Pressure Monitoring Systems Certification** trains power users of Snap-on TPMS₄ tire diagnostic equipment. Upon successful completion of the certification curriculum and hands-on lab exercises, certified technicians can safely and productively utilize all features found on Snap-on TPMS₄ diagnostic equipment. The curriculum includes training materials and practical lab exercises designed to develop tire service knowledge and professionalism that are **TOOLS FOR LIFE** for those pursuing careers in automotive maintenance technology and collision repair.

The **Tire Pressure Monitoring Systems Certification** includes training in problem-solving with and programming of tire pressure monitoring sensors. Training covers the description, diagnostics, servicing, and programming of sensors and vehicle. The unique design of the class allows students to pressurize and activate sensors in a classroom environment without a wheel and tire assembly.

The **Snap-on Tire Pressure Monitoring Systems Certification** provides an industry-recognized endorsement of technical expertise and demonstrated ability in tire service. When students successfully complete this Snap-on certification, they possess one of the most requested skills in the industry today.

COURSE CONTENT INCLUDES:

- Equipment Safety
- Introduction to TPMS
- TREAD Act
- TPMS Types
- TPMS Light Status
- Communication and Frequency
- TPMS Service
- Settings, Testing, and Resetting
- Programming of Sensors
- Advanced Features

BUILDING TOOLS FOR LIFE

Snap-on certifications provide a return on technical education investment through hands-on training and state of the art tools and equipment. The **Snap-on Tire Pressure Monitoring Systems Certification** connects directly to the following academic subject areas:

- Automotive Maintenance Technology
- Auto Collision Repair & Refinishing

Students earn Snap-on certifications as proof of achievement. These NC₃ stackable credentials increase employment potential and on-the-job productivity in industries such as:

- Automotive Repair
- Fleet Maintenance
- Collision Technology
- Light Equipment Maintenance and Repair
